CONSOLIDATED WEBSITE REPORT

Three Website Projects

1. **Telugu Movie World**
2. **Travel Agency — TravelVista**
3. **Golden Spoon Restaurant & Cafe**

Prepared from the three supplied HTML webpages

Report date: 25 October 2026

Purpose

This report describes the purpose, main features, content, and practical limitations of each of the three website projects. It is limited to these topics and is based on the supplied webpage code.

1. Telugu Movie World

Overview

Telugu Movie World is a movie information and review webpage designed to help visitors explore selected Telugu films, read short descriptions, view ratings, and submit their own reviews.

Main features

- Navigation links for Home, Movies, and Write a Review.
- Movie cards show the film title, genre, release year, director, cast, story summary, rating, and a short review.
- A review form lets a visitor enter their name, select a movie, choose a one-to-five-star rating, and write a comment.
- The layout uses a dark visual theme with coloured headings and movie-card styling; CSS supports a responsive presentation.

Movies included

Movie	Release	Genre	Displayed rating
Godavari	2006	Romance / Drama	4.2/5
SVSC — Seethamma Vakitlo Sirimalle Chettu	2013	Family / Drama	4.3/5
Sita Ramam	2022	Romance / Period Drama	4.7/5
Hi Nanna	2023	Family / Romance	4.6/5

Implementation notes

The poster paths are local files (godavari.jpg, svsc.jpg, sitaramam.jpg, and hinanna.jpg) inside a movies folder. Those files must be present at the expected relative path for posters to display. The review form uses JavaScript to add a review to the page currently open; the supplied code does not establish permanent storage or a server-side review database.

2. Travel Agency — TravelVista

Overview

TravelVista is a holiday-planning webpage that presents destination options, package prices, trip durations, itinerary ideas, and forms for finding packages or sending a travel inquiry.

Destinations and package information

Destination	Listed price per person	Duration	Itinerary highlights
Ooty	■8,999	3 days	Ooty Lake, Botanical Garden, Doddabetta Peak, tea gardens
Darjeeling	■12,999	4 days	Tiger Hill, Batasia Loop, Ghoom Monastery, tea estates
Meghalaya	■14,999	5 days	Shillong, Cherrapunji, living root bridges, Dawki, Mawlynnong
Agra	■5,999	2 days	Taj Mahal, Agra Fort, local markets and heritage sights

Main features

- Destination cards with images and brief package information.
- Holiday package and itinerary sections that help visitors understand trip length and possible sightseeing activities.
- A package search form that asks for a destination, travel date, and number of travellers.
- A travel inquiry form for contact details, travel preferences, group size, budget, hotel preferences, and other requirements.
- Responsive styling and remote image links for destination visuals.

Implementation notes

The listed prices should be treated as illustrative webpage content, not confirmed live quotations. The HTML alone does not verify availability, inclusions, taxes, transport, hotel rates, or seasonal pricing. The inquiry form should be connected to a backend, email service, or CRM and tested before being used to accept real customer requests.

3. Golden Spoon Restaurant & Cafe

Overview

Golden Spoon is a restaurant and cafe website that introduces the dining experience, displays food items and prices, introduces chefs, shows customer testimonials, provides contact/opening-hour information, and offers a table-reservation form.

Menu items listed

Item	Description in webpage	Price
Chef's Special Platter	A combination of fresh flavours	■299
Creamy Italian Pasta	Creamy pasta with herbs and cheese	■249
Classic Cheese Burger	Burger menu item	■199
Signature Cafe Coffee	Cafe coffee	■129
Chocolate Dessert	Chocolate dessert	■149
Garden Fresh Salad	Fresh salad	■179

Main features

- Home and About sections describing the restaurant's food, hospitality, and dining atmosphere.
- Menu cards with food images, descriptions, and prices.
- Chef profiles for Chef Arjun, Chef Priya, and Chef Rahul.
- Customer testimonials and a contact section with opening-hour information.
- A reservation form that collects name, email, phone number, number of guests, date, time, and special requests.
- A warm restaurant-style design with responsive layout rules for smaller screens.

Implementation notes

The reservation form displays a confirmation-style message in the webpage, but the supplied code does not demonstrate a real reservation system or storage of booking details. Reservations should be confirmed directly with the restaurant until a backend or booking service is connected. The local image references chef.jpg and men.jpg must exist in the expected location; remote Unsplash images also require an internet connection.

Summary

The three webpages serve different purposes: Telugu Movie World presents films and visitor reviews; TravelVista organizes holiday destinations, itineraries, and travel inquiries; and Golden Spoon promotes its restaurant, menu, chefs, and table reservations. Each project has a clear content structure and responsive styling. Before real-world deployment, check all image paths and test the forms; any feature that needs to save or send user submissions requires an appropriate backend or connected service.
